PROFILE

Product Designer (UX/UI) with 2.6 years of experience designing AI-powered digital products across **B2B SaaS** and **B2C interactive experiences**. Skilled in transforming complex AI capabilities into intuitive, human-centered interfaces. Experienced in end-to-end product design from user flows and wireframes to prototypes, design systems, and handoff. Collaborated closely with frontend, backend, and AI/ML teams to translate product requirements into seamless user experiences. Additionally supported branding, landing pages, and marketing design to maintain product consistency across touchpoints.

PROFESSIONAL EXPERIENCE

Product Designer 06/2023 – Present | Chennai, India

Ailaysa Technologies

Ailaysa: AI-powered multilingual content platform for creators and enterprise teams.

Key Contributions

- Designed end-to-end UX/UI for AI writing, translation, voice generation, and image creation workflows.
- Collaborated with product, engineering, and AI/ML teams to understand model behavior and design intuitive human–AI interaction patterns.
- Created scalable design systems and UI components used across various modules, improving visual consistency and development efficiency.
- Improved usability and clarity of multi-layered workflows, contributing to significant user growth and engagement.
- Designed landing pages, social media creatives, and print materials to support product positioning and brand identity.
- Balanced enterprise requirements with consumer usability, enabling both B2B and B2C adoption.

Chaireader: AI-interactive reading platform enabling conversational story exploration. (within Ailaysa)

Key Contributions

- Led UX/UI from concept to launch for a new AI reading product developed from scratch.
- Designed conversational interaction patterns, reader flows, and visual hierarchy for immersive AI-driven reading experiences.
- Worked directly with AI/ML teams to shape how users interact with story intelligence, Q&A, and narrative branching.
- Built prototypes and interaction models used for user testing and stakeholder alignment.
- Created a scalable UI system adaptable for white-label enterprise clients.
- Contributed to early product traction through intuitive onboarding and clear navigation flows.
